You also don't want to spend a lot of time or money creating these images (because, let's face it—social media posts have a very short lifecycle).. Is this app suited well for social media marketing? Some apps are awesome, but have too many features when all you want to do is put together a good image to go with a social promotion.. Buffer will save your time to schedule posts 'A picture is worth a thousand words'—but what to do when your image is one of a thousand other images?Once, it was sufficient—maybe even novel—to share an image on social media every once in awhile.. But allow me to quickly condense my 5 favorite Mac-based productivity Many times, it can be tricky to analyze what's working and what's not on several social media channels.. The secret to creating these kinds of images is having a lot of great templates and design resources (images, icons, shapes, text styles) all readily available, so all you have to do is mix, match, and message. When testing and evaluating apps, I had a few key criteria that each app needed to meet to be included: Is this app easy enough for amateur designers? In most cases, your company's designer (should you be lucky enough to have one) is not who will manage your social media.. So how can you create images that stand out from all the other images in your audience's Facebook, Twitter, and other social feeds? More importantly, how can you create images that drive engagement with your brand and traffic to your website or blog? Well, for starters, you're going to need a good design tool.. Thus, I wanted to make sure these apps could be used effectively by people (like me) with minimal knowledge about design and design tools.. What Makes a Great Social Media Image App? You want to make an image that will catch your followers' eyes—something that will make them click and share and keep watching for the next great thing you post.. I tested over 15 apps to bring you this short and sweet list of the best free apps for creating your own vibrant and professional social media images. [Typing Program For Mac](#)
