Lightweight alternatives to Apple Pages, Numbers and Keynote

Apple's office suite - Pages, Numbers and Keynote - are huge apps that are getting bigger with each update. If you have a low end Mac with a small disk, here are lightweight alternatives.

Just how big are these apps getting? Very big!

Pages	429MB
Numbers	356MB
Keynote	684MB

That is just under 1.5GB of software!

Some of the MacBooks currently available from Apple have disks that are just 128GB. Bear in mind that macOS will take a large portion of this and so there isn't a lot of space left for your software.
